-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 3- 4 in the reply filed on 5/23/05 is acknowledged, however the requirement is withdrawn as the elected claims 3 and 4 are dependent on claim 1, which was not elected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Cusack.

Cusack, U.S. Patent No. 4,711,700 discloses a method for densifying leadframe conductor spacing. As shown in Figures 2 – 4, the lead frame comprises a plurality of leads arranged in parallel. Each lead has an inner lead portion and an outer lead portion. The inner lead portion has a fine inner lead portion and a middle inner lead portion, which connects the fine inner lead portion to the outer lead portion. Figure 3 shows the relative thicknesses of the outer lead portion 22, which is T and the inner lead portion, which is t. The relationship between the two thicknesses is that T is about four times as thick as t.

Allowable Subject Matter

Claims 2 – 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Braden, U.S. Patent No., 5025,114, discloses a multilayered leadframe for integrated circuit packages. As shown in Figures 8 and 9, the leadframe includes a plurality of leads 14' arranged in parallel.
